

You are cordially invited
AMA/Reseau Mesure Innovation Day
Thursday, October 19, 2023, from 9:30 to 16:00

Our host:
Innovative Sensor Technology IST AG
Stegrütistrasse 14, 9642 Ebnat-Kappel, Switzerland

Just as market success in today's sensor business depends heavily on innovation, so is it important to keep your ear to the ground for developing business opportunities and to network in person.

At this meeting we will do both: we will come together to hear in-person presentations of particularly noteworthy current sensor innovations. And we will enjoy ample opportunity to discuss and network with each other across thematic and regional boundaries.

The innovation presentations will come from the pool of recent submissions and winners of the AMA Innovation Award for sensors.

AMA and Reseau Mesure are two professional associations. Both promote collaboration and networking among their constituents from the sensors and measurement industry. From its history, AMA's members tend predominantly to come from German speaking regions in Europe and from industry as well as academia. Reseau Mesure predominantly represents French member companies.

Participation is exclusively reserved for members of AMA and Reseau Mesure.
The meeting will be held in English language. The number of participants may be limited.

Wednesday, October 18, 2023 (optional)

19.00 Dinner together at the Hotel Säntis (Schwägalp)*

Thursday, October 19, 2023

09:30 Welcome and introduction
